

# MARKETSEVEN INDEX<sup>®</sup> ANNUITY

Fixed index annuity geared toward helping you accumulate retirement assets

Build income to achieve your future goals with the advantages of index-linked performance and downside protection.

Throughout your working years, retirement may have seemed like a lifetime away. Now, it's closer than ever, and you're likely adding plenty of plans to your bucket list. To bring your wishes to life, you'll need to boost your future income and protect what you've built.

At EquiTrust, we know how important your goals for retirement are. That's why we offer a seven-year fixed index annuity to help you achieve them — MarketSeven Index® Annuity.

## HOW DOES A FIXED INDEX ANNUITY WORK?

A fixed index annuity (FIA) — like MarketSeven Index® — is a product designed to provide you income for retirement through interest earned on market indices. Your money is never exposed to downside market risk. In fact, you share only in the gains, not the losses.

### Growing your Accumulation Value

It starts by choosing your index accounts and crediting strategies, providing you the ability to diversify your retirement strategy. Then, on appropriate contract anniversaries, "index credits" are determined on these accounts and applied to your contract's current Accumulation Value.

If the index value increases, your Accumulation Value grows. If the index value declines, your Accumulation Value will simply remain unchanged from the previous period's Accumulation Value. Index credits will never be less than zero.

## ADVANTAGES OF MARKETSEVEN BONUS INDEX®

Your FIA contract is backed by the claims-paying ability of the insurance company, EquiTrust. FIAs offer several important advantages:

Protection of your principal

Withdrawal privileges<sup>2</sup>

Tax-deferred earnings

Guaranteed lifetime income with the optional Income Benefit Rider (IBR)

Built-in guarantees<sup>1</sup>

## YOU CONTROL YOUR MONEY – COMING IN OR GOING OUT

MarketSeven Index® puts you in the driver's seat, with flexibility and options that give you control over your money.

### Premiums

After your initial premium payment, you may add subsequent premiums at any time. You may allocate your premiums to the fixed rate account or index accounts.

### Fixed rate account

**1-Year Interest Account** — Interest rate is guaranteed for one contract year. May change subject to contractual Minimum Guaranteed Interest Rate on each contract anniversary. Subsequent premiums are applied to this account until contract anniversary, then allocated per instructions.

## Index accounts

A variety of index accounts offer earnings — called index credits — based on the changes of a specified index. Credits are never less than zero, and are added to accounts at the end of the one-year or two-year period. Cap and participation rates are reset annually or every two years.

Account options	Indices		
	S&P 500 Index	S&P Marc 5% Excess Return Index	Barclay's Focus50 Index
<b>1-Year Point-to-Point Cap</b> — Percentage change from previous contract anniversary, up to specified cap.	X		
<b>1-Year Monthly Average Cap</b> — Percentage change from previous contract anniversary to monthly index average, up to specified cap.	X		
<b>1-Year Monthly Average Participation</b> — Percentage change from previous contract anniversary to monthly index average, multiplied by participation rate.	X		
<b>1-Year Monthly Cap</b> — Cumulative sum of capped monthly changes from previous contract anniversary. Each monthly gain subject to a cap, but monthly declines not subject to a floor.	X		
<b>2-Year Monthly Average Cap</b> — Percentage change from previous two-year contract anniversary to monthly index average over two-year period, up to specified cap.	X		
<b>1-Year Point-to-Point Participation</b> — Percentage change from previous contract anniversary, multiplied by participation rate.	X	X	X
<b>2-Year Point-to-Point Participation</b> — Percentage change from previous two-year contract anniversary, multiplied by participation rate.			X

## About the indices

### S&P 500 Index<sup>3</sup>

Visit [SPIndices.com](https://spindices.com)

Ticker: SPX

Widely regarded as the best single gauge of large-cap U.S. equities. More than \$15.6 trillion is indexed or benchmarked to the S&P 500 Index, with indexed assets comprising approximately \$7.1 trillion of this total. Includes 500 leading companies and covers approximately 80% of available market capitalization.

### S&P MARC 5% Excess Return Index<sup>3</sup>

Visit [SPIndices.com](https://spindices.com)

Ticker: SPMARC5

Seeks to provide multi-asset diversification within a simple risk-weighting framework, tracking three underlying component indices that represent three asset classes: equities, commodities and fixed income. This index is dynamically rebalanced between the three indices and the cash component to target a 5% level of volatility. In low-volatility environments, the index risk-control mechanism increases market exposure to riskier assets by increasing the allocation to the index (up to a leveraged position of 150%).

### Barclays Focus50 Index<sup>4</sup>

Visit [Indices.Barclays/Focus50](https://indices.barclays/focus50)

Ticker: BXIIF50E

Seeks growth opportunities while limiting volatility through exposure to a dynamic combination of U.S. stocks and U.S. Treasury Indices. Low-volatility U.S. stocks are used because, historically, they have tended to outperform other, higher volatility stocks on a risk-adjusted basis. The broad universe consists of all stocks listed on the NYSE and NASDAQ issued by companies headquartered in the U.S. The addition of Treasuries adds a diversification benefit and a potential reduction in risk. To further control risk, the index aims to limit its annual volatility to a 5% target using a process called volatility control.

**Because not all accounts perform consistently through varying market cycles, diversifying your premium among a variety of strategies — and indices — can help you realize more steady overall performance from your fixed index annuity.**

## IMPORTANT FEATURES THAT OFFER PEACE OF MIND

### Account transfers

On each contract anniversary, you may transfer money among the various accounts offered in your contract. Transfers out of a two-year account are allowed only at the end of each two-year period.

### Allocation of additional premiums

At any time, you can request a change to your premium allocations. These updates take effect on the following contract anniversary, and apply only to any additional contributions during the current contract year.

### Free withdrawals

You may withdraw up to 10% of the Accumulation Value each year after the first contract year without paying any charges.<sup>2</sup>

### Lump-sum payment option

Your contract's cash surrender value is available as a lump sum at any time. Surrender charges are in effect during the first seven contract years, are a percentage of the Accumulation Value, and decline annually: 9, 8, 7, 6.5, 5.5, 4.5 and 3.5%.<sup>5</sup> In addition, early surrenders or withdrawals over 10% may be subject to a Market Value Adjustment<sup>6</sup> (MVA). At the end of the surrender charge period, your cash surrender value will equal the full Accumulation Value.

### The value of tax deferral

Currently, all interest income earned on an annuity accumulates on a tax-deferred basis. You won't need to pay income taxes on your annuity until you receive a payment from your contract. If you're under age 59½ at the time of withdrawal, there may be an additional 10% IRS penalty.<sup>7</sup>

## EquiTrust is a name you can trust

At EquiTrust, we're committed to being a financial partner you can trust with your retirement dreams. Rest assured your annuity contract is backed by a company with conservative investment strategies, anchored by a disciplined and diversified management style. EquiTrust is supported by a history of success, experience and strength. Magic Johnson Enterprises — a diversified consortium of business entities and partnerships — owns a controlling interest in EquiTrust.

### **Guaranteed Accumulation Value benefit**

At the end of year seven, your Accumulation Value is guaranteed to be no less than 107% of your premiums less any partial withdrawals and Income Benefit Rider fees.

### **Minimum Guaranteed Contract Rate**

You're guaranteed to receive no less than 87.5% of your premiums — less any partial withdrawals — accumulated at the Minimum Guaranteed Contract Rate (MGCR). Ask your agent/producer for this rate.

### **Nursing Home Waiver**

The Nursing Home Waiver, included at no charge on your contract, can help provide you peace of mind. If you're confined to a nursing home or hospital for 90 consecutive days or more, your contract's Accumulation Value will be available without surrender charges or MVA<sup>6</sup> beginning in the second contract year and during your confinement.<sup>8</sup> This rider is available at issue through age 80.

### **Terminal Illness Rider**

This no-charge rider can provide assurance that if you're diagnosed with a terminal illness, charges will be waived for a withdrawal of up to 75% of your contract's Accumulation Value.<sup>8</sup>

### **Death benefit**

If you die, the full Accumulation Value of your contract will be paid to your beneficiary(ies), without surrender charges or MVA.<sup>6</sup>

### **Free-look period**

After your contract is issued, you have a specified number of days to review it; see your contract for complete details. If you're not completely satisfied with the terms, you may return the contract and receive 100% of your premiums paid, minus any prior withdrawals.

## GUARANTEED LIFETIME INCOME – THE INCOME BENEFIT RIDER

You can add the optional Income Benefit Rider (IBR) to your MarketSeven Index® contract to take advantage of these benefits:

- ✓ Lifetime income based on 7% accumulation plus index and interest credits for up to seven years
- ✓ A 25% bonus added to your Benefit Base for premiums paid in the first year
- ✓ A guaranteed<sup>1</sup> stream of income for life – without annuitizing
- ✓ The ability to double your income for up to five years in the event of a chronic illness
- ✓ Flexibility and control to start and stop income payments when it works for you
- ✓ All of this while maintaining your annuity benefits

At any time after the first contract year and age 50, you can elect to begin lifetime income withdrawals. Your payments will never decrease if you withdraw only your income amount each year. In certain situations, your payments may increase.

### How do I qualify for the IBR?

The owner of the annuity must be age 40 or older to elect the IBR, and it can be added only during the annuity application process. To qualify, the owner and annuitant must be the same person, and joint owners must be spouses; spouse may include domestic partner (in some cases, but does not include spousal continuation).

### Calculating income withdrawal amounts

Your payments will be calculated based on this equation:

The diagram illustrates the calculation of income withdrawal amounts using three icons and text labels. On the left, an icon of a hand holding a coin with a percentage sign is labeled "Income withdrawal percentage". In the middle, an icon of a sun with rays is labeled "Benefit Base". On the right, an icon of a hand holding a coin with a curved arrow above it is labeled "Income withdrawal amount". The labels are connected by a multiplication sign (X), an equals sign (=), and the text "Income withdrawal amount" is positioned below the right-hand icon.

$$\text{Income withdrawal percentage} \times \text{Benefit Base} = \text{Income withdrawal amount}$$

On your contract anniversary, your income withdrawal amount will be recalculated as the greater of the prior year's income withdrawal amount or the original income withdrawal percentage multiplied by the current Benefit Base.

## Determining your income withdrawal percentage

The income withdrawal percentage is based on your age at the time you first elect to receive income withdrawals. It increases by 0.10% each age between the ages shown below. Once income withdrawals start, the percentage will never change.

Let's see how that works out for single life and joint life income withdrawals:

Age of owner at first income withdrawal	Single life income withdrawal percentage	Joint life income withdrawal percentage
50	5.50%	4.50%
55	6.00%	5.00%
60	6.50%	5.50%
65	7.00%	6.00%
70	7.50%	6.50%
75	8.00%	7.00%
80	8.50%	7.50%
85	9.00%	8.00%
90+	9.50%	8.50%

## Benefit Base

Your annuity's Benefit Base is equal to all premiums plus a 25% Benefit-Base bonus on first-year premiums paid, less withdrawals, compounded at 7.00% annually for up to seven years, or until the start of your income withdrawals, if earlier.<sup>2</sup> We use the Benefit Base only to calculate the income withdrawal amount — it's not available at surrender, death or annuitization.

After you start income withdrawals, the Benefit Base will be set equal to the Accumulation Value on each subsequent contract anniversary, if the Accumulation Value is higher. This means income withdrawal amounts can potentially increase from year to year.

## Additional premiums

The Benefit Base will increase with any additional premiums, and will reflect a 25% bonus for all first-year premiums paid. You may not add premiums after you begin income withdrawals.

## Flexible income withdrawals

You can start income withdrawals at any time after the first contract year and age 50 (both owners). Unlike annuitizing your contract, the IBR gives you the flexibility to stop and restart income withdrawals when you choose. Payments continue for life, even if your contract's Accumulation Value is depleted.

Income withdrawals may be taken monthly, quarterly, semi-annually or annually. After they start, the annual penalty-free withdrawal amount is the greater of 10% of the Accumulation Value or your income withdrawal.

## Excess withdrawals

It's possible to withdraw more than your income withdrawal amount at any time, but it will reduce your future income withdrawals permanently.

- Any amount withdrawn in addition to your income withdrawal is considered an excess withdrawal, with the exception of a Required Minimum Distribution (RMD).
- If the excess withdrawal amount exceeds the penalty-free provisions of the contract, it may be subject to a surrender charge or MVA.<sup>6</sup>
- Excess withdrawals reduce future income withdrawals and the Benefit Base in proportion to the reduction in Accumulation Value.

## Waiting can boost your income

Starting income withdrawals later can significantly increase your income over the remaining years, as shown here.

Issue age	\$100,000 premium Annual income withdrawal starting after:		
	1 year	5 years	10 years
60	\$8,828	\$12,272	\$15,054
65	\$9,496	\$13,149	\$16,058
70	\$10,165	\$14,026	\$17,061
75	\$10,834	\$14,902	\$18,065

## If you stop income withdrawals

You have the option to stop income withdrawals at any time. While the payments are stopped, partial withdrawals in excess of the income withdrawal amount will be considered excess withdrawals and reduce your future income withdrawal amount. If you decide to restart income withdrawals, the income withdrawal amount will be the greater of the prior income withdrawal amount (adjusted for any excess withdrawals) or the original income withdrawal percentage multiplied by the current Benefit Base.

## IBR fee

The IBR has an annual rider fee of 1.25% of your Accumulation Value on each contract anniversary. This fee is deducted proportionately from each crediting account.

## Enhanced Income Withdrawals during chronic illness

It's no secret the cost of nursing care later in life could have a big impact on your retirement savings. To help you prepare for these potential expenses, the IBR features Enhanced Income Withdrawals — included at no additional cost.

If you become chronically ill, your income withdrawal amounts may be doubled for up to five years; for joint owners the increase is 50%. A chronic illness is defined as the permanent inability to perform at least two of six activities of daily living, which include eating, toileting, transferring, bathing, dressing and continence — or permanent cognitive impairment. If utilized, the original income payment amount resumes when Enhanced Income Withdrawals end.

Enhanced Income Withdrawals may be put into action after your contract has been in effect for three years, if the contract has an Accumulation Value greater than zero, no additional premiums have been added in the last two years and the owner is a U.S. resident not older than age 90. During the Enhanced Income Withdrawal period, the chronic illness must be certified by a physician annually.

## Terminating the IBR

The IBR can be terminated upon your request, but once terminated, it cannot be restarted. It automatically terminates in the event of:

- ✓ Death of first contract owner, unless spousal continuation is elected
- ✓ Full surrender
- ✓ Annuitization
- ✓ Contract ownership change other than a spousal continuation or the addition of a spousal joint owner
- ✓ Excess withdrawals that reduce the Accumulation Value to zero

## Want to learn more about MarketSeven Index®?

This brochure includes only a summary of the product. Availability and certain features and benefits may vary by state. Ask your agent/producer for complete contract provisions and details before purchasing.

<sup>1</sup> The guarantees expressed in this brochure are based on the claims-paying ability of EquiTrust Life Insurance Company.

<sup>2</sup> Surrender of the contract may be subject to surrender charges or market value adjustment. Withdrawals before age 59½ may result in a 10% IRS penalty tax. Withdrawals do not participate in index growth. In the event of a full surrender, charges will apply to any penalty-free amounts taken during the same contract year. If the Income Benefit Rider is elected, any withdrawals prior to the start of income withdrawals will reduce the Benefit Base proportionately.
